PIANO, STROUD PIANOLA PLAYER PIANO

This is a motorized player piano. It also has the foot peddles to pump the movement.

This has been in our family for almost 50 year. It hasn't been played in 50 of so

years. I plugged it in to play it. The motor is not turning on.

There are several rolls of music.

please contact me for more information and pictures.

This piano has a wonderful sound and touch for playing.
