Schimmel Upright Piano free for a good home!
Our Schimmel piano was built in the 1890's by a German immigrant living in Fairbault, MN. We found this out by some research done by a former piano tuner. Before us it was owned by a piano teacher in Shakopee. As a result it received some heavy use and needed some work done on it. We had the action rebuilt, the keys restored, and installed a Damp-Chaser which is an automatic humastat that maintains the proper humidity. It is now due for a tuning and we have decided because we are now retired, and on limited income, we do not want to put more money into tuning it each year. We have an electronic, smaller piano that we use now. The upright is a beautiful piano and we would love to see others enjoy it as we have over the years.

Width: 62inches, Height: 57 inches, Depth; 27inches.
