1950's combination piano and organ. Piano has a some nicks and works fine but haven't plugged in organ (tubes) for 20 +years. Doubt organ works without replacing tubes. Have had it tuned before. Easily fits in any size room and is L57xW25xH39

We do not play it any longer, would love to have someone put it to good use, and want the space for something else. Yours for picking it up!
