

Weber Baby Grand Piano - early 1900s refinished

Chelmsford, Massachusetts 01863
United States

My wife and I are looking to re-home a piano we got from this site a few years back. It has seen some wear and will need tuning but sounds good. A few key tops could stand to be replaced (cracked or chipped). It was painted black fairly recently, the underlying finish has some checking from being stored in a garage for years by the previous owner.

We are just looking for someone to take it. It is in the room right insight our front door. There is one step down to a small porch and then about 5 steps to the walk way. The bottom of the stairs are about 15 feet from the sidewalk/street.
