Free 1930s Gulbransen piano in South Tacoma

This is a great piano with a nice sound. There are a few chips in some of the overlays but that doesn't affect playability. My "piano guy" looked it over and says all the internal parts are in excellent condition. The piano is right next to our front door with 4 steps down to the yard and 2 steps to the sidewalk. I can recommend a fantastic piano mover with reasonable rates if you don't have a vehicle to haul it yourself. Piano measures 56in long x 44.5in tall x 24in deep.

I love this piano and am only passing it on because my cousin has offered me our great grandmother's piano. Please let me know if you are interested. Text preferred but calls and emails are ok, too.
